

PCNE Working Symposium 2018, Fuengirola, Spain

Workshop 2. Brief report
Using the PCNE DRP-classification at transitions
between care settings

Facilitators: Nejc Horvat and Foppe van Mil, with the support of
Tommy Westerlund and Markus Lampert

The aim of the workshop

- ▶ To check the suitability of the PCNE DRP Classification V8.02 to the seamless care situations and collect comments and suggestions for improvements of the classification system to better reflect seamless care

Series of exercises:
using the
classification in cases

Process

- ▶ Code 5 standardised cases & discuss in smaller groups
- ▶ Discuss coding of the groups
- ▶ Code 5 Seamless care cases & discuss in smaller group
- ▶ Discuss coding of the groups
- ▶ Plenary discussion about adaptations needed

Examples of suggestions

▶ Problem-

- “How to deal with or code related problems in one patient?”
- Reconciliation problem

▶ Missing Causes:

- “Medication reconciliation (review) missing”
- “Information on discharge missing”
- “Insufficient information about the patient”
- “Misunderstanding of the medication plan”
- “Deliberate nonadherence”

▶ Missing Interventions:

- “Keeping the patient under surveillance”, “Drug paused” (next to “Drug stopped”), “Medication reconciliation”

Workshop 2: Using the PCNE DRP-classification at transitions between care settings

Facilitators: Nejc Horvat and Foppe van Mil, with the support of
Tommy Westerlund and Markus Lampert
