

The COME-ON study: development of a Drug-Related Problems classification tool

PCNE: 19/02/2016 - Hillerød

Goedele Strauven, PharmD

Clinical pharmacology and pharmacotherapy

KU Leuven

Funded by

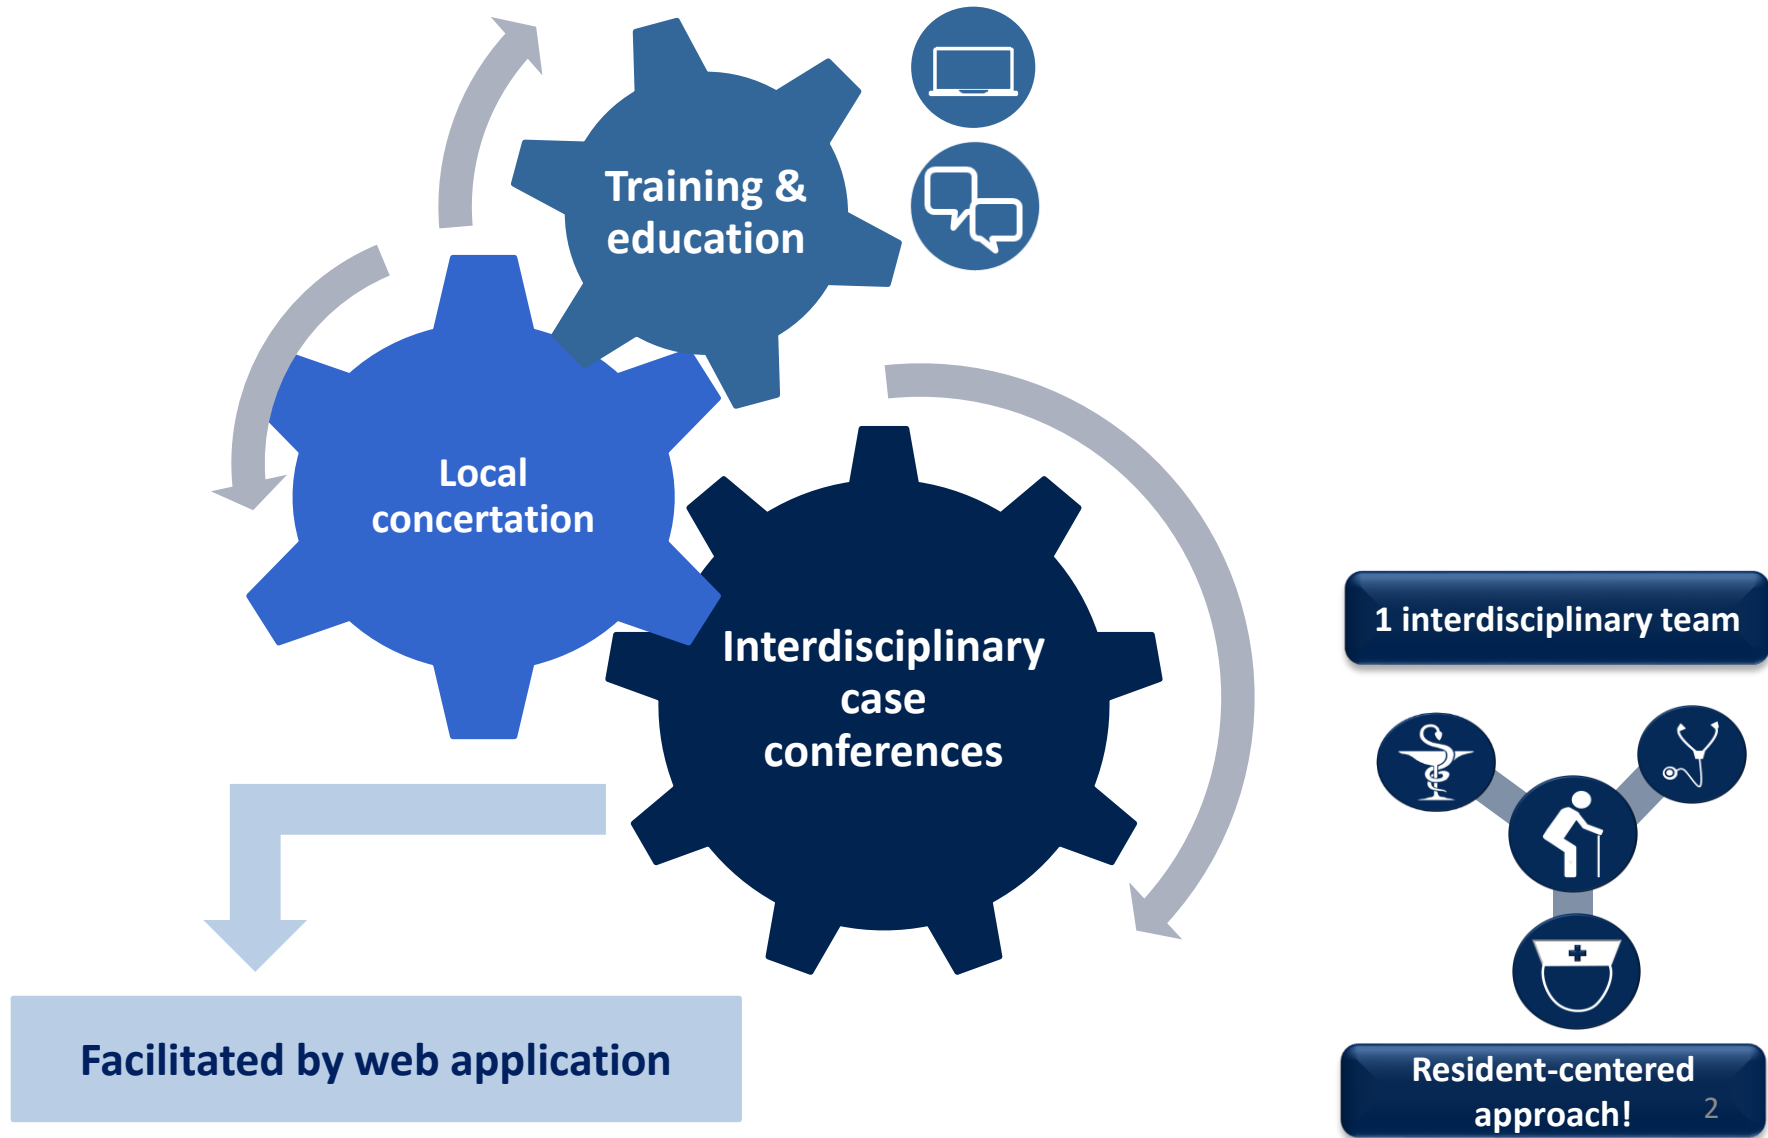

UCL

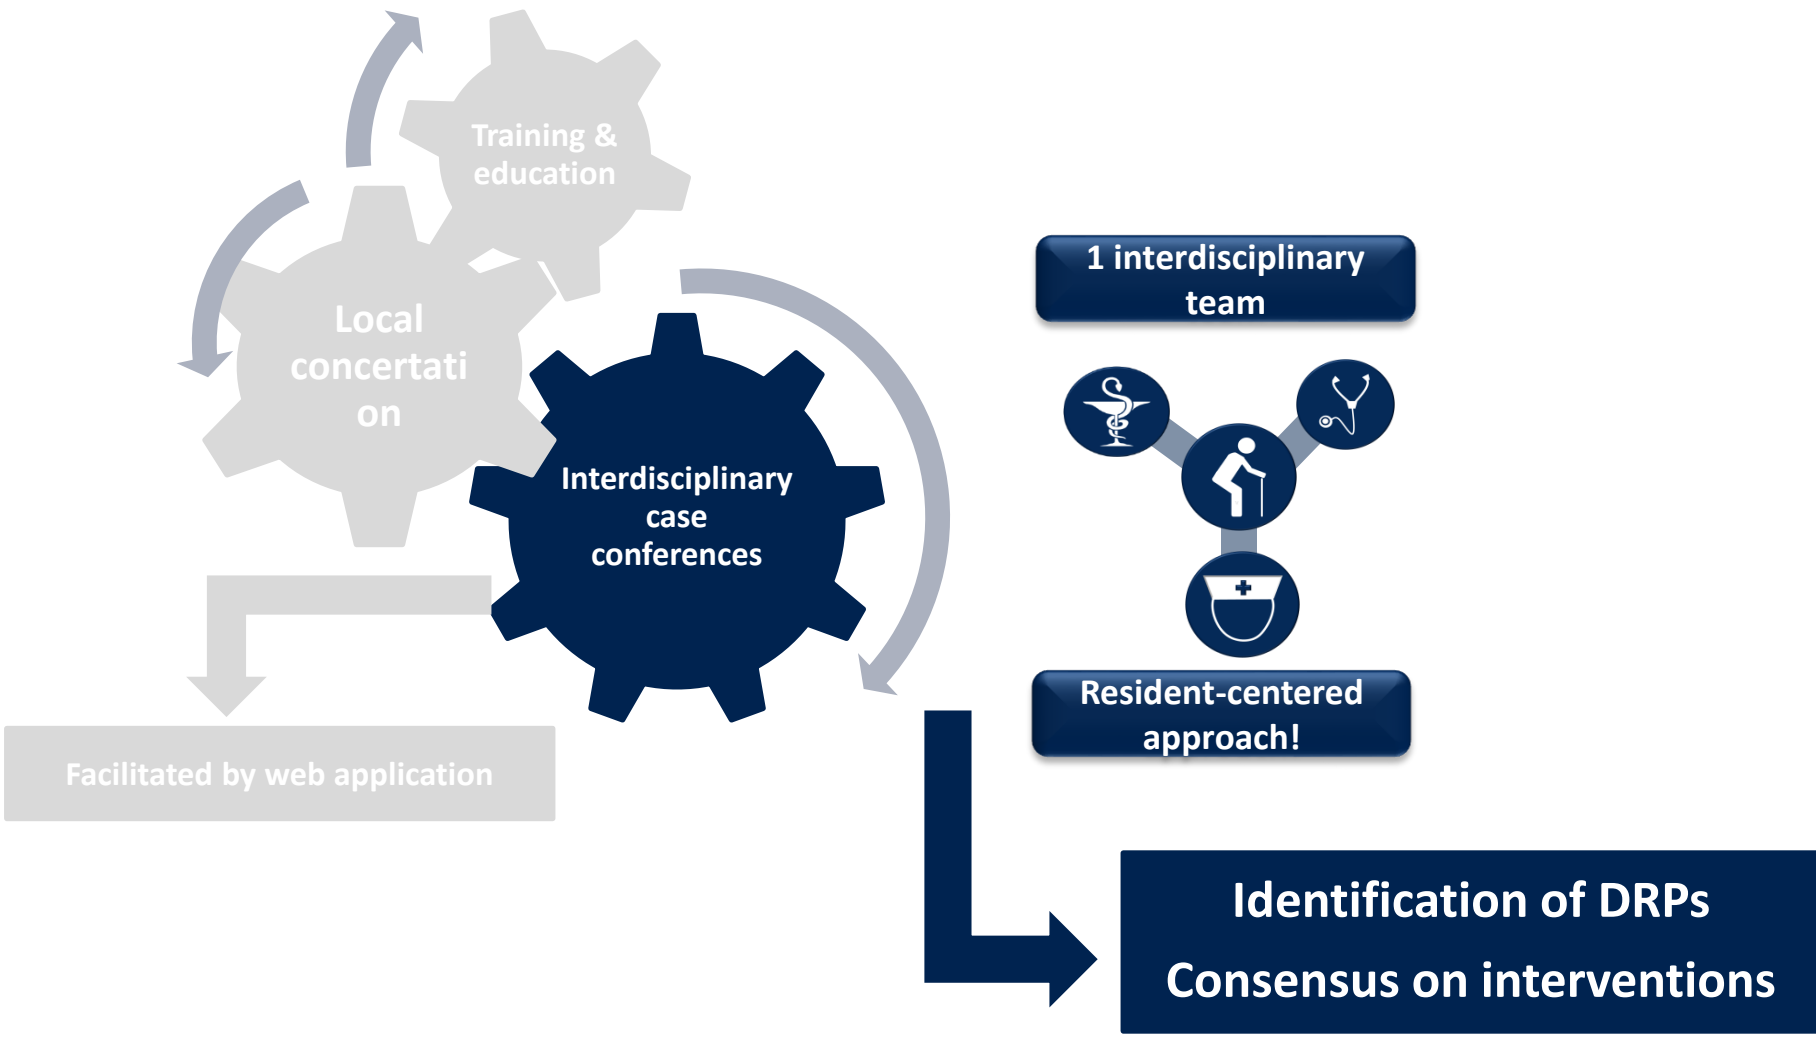

Université catholique de Louvain

KU LEUVEN

A complex and multifaceted intervention

Interdisciplinary case conferences

Aim = development of an electronic DRP-tool

- User-friendly
- Comprehensive
- Reliable

Incorporated in web-
application

Specific for:

- The NH setting
- Interdisciplinary case conferences

Literature
Existing classification tools

Application of drug-related problem (DRP) classification systems:
a review of the literature
Benjamin J. Basger · Rebekah J. Moles ·
Timothy F. Chen

Inter-rater reliability and
content validity

Final version

Development and adaptation
of DRP-tool & clinical cases for
the NH setting

Test phase: clinical cases

Type of DRP

- Potential
- Actual

N=2

Cause of DRP

- Drug selection
- Drug form or route
- Dose selection
- Treatment duration
- Drug use
- Non-justified discrepancies
- Monitoring
- Unavoidable side effect
- Other

N=9; n=20

Intervention

- Discontinuation / tapering medication
- (Re-)start of drug
- Modification of active compound
- Dosage increase
- Dosage decrease
- ...

N=17

Type of DRP

- Potential
- Actual

N=2

Cause of DRP

- Drug selection
- Drug form or route
- Dose selection
- Treatment duration
- Drug use
- Non-justified discrepancies
- Monitoring
- Unavoidable side effect
- Other

N=9; n=20

Intervention

- Discontinuation / tapering medication
- (Re-)start of drug
- Modification of active compound
- Dosage increase
- Dosage decrease
- ...

PCNE 6.2

- 4 primary domains
- Type problem: Potential - Manifest

GSASA

- 5 primary domains
- Type problem: Potential - Manifest

Come-On study

- No domains

POTENTIAL

- No signs or symptoms at identification
- Thanks to timely intervention: **no consequences**
- **Unsufficient information** for impact on patient's health

ACTUAL

- **Signs or symptoms** at identification
- **Impact on patient's health**

Type of DRP

- Potential
- Actual

N=2

PCNE 6.2

- 8 primary domains
- Patient – Logistics
- Multiple causes

GSASA

- 7 primary domains
- Patient- Logistics - Quality of prescription
- 1 choice

Basger et al., 2015

- 9 primary domains
- 58 *sub-sub* categories
- Logistics
- Multiple causes

Come-On study

- 9 primary domains
- 20 sub-domains
- Non-justified discrepancies in medication list (*transition to other setting*)
- 1 choice

Type of DRP

- Potential
- Actual

N=2

Cause of DRP

- Drug selection
- Drug form or route
- Dose selection
- Treatment duration
- Drug use
- Non-justified discrepancies
- Monitoring
- Unavoidable side effect
- Other

N=9; n=20

Intervention

- Discontinuation / tapering medication

PCNE 6.2

- 5 primary domains
- Depending on level (prescriber-patient-drug)
- Multiple interventions

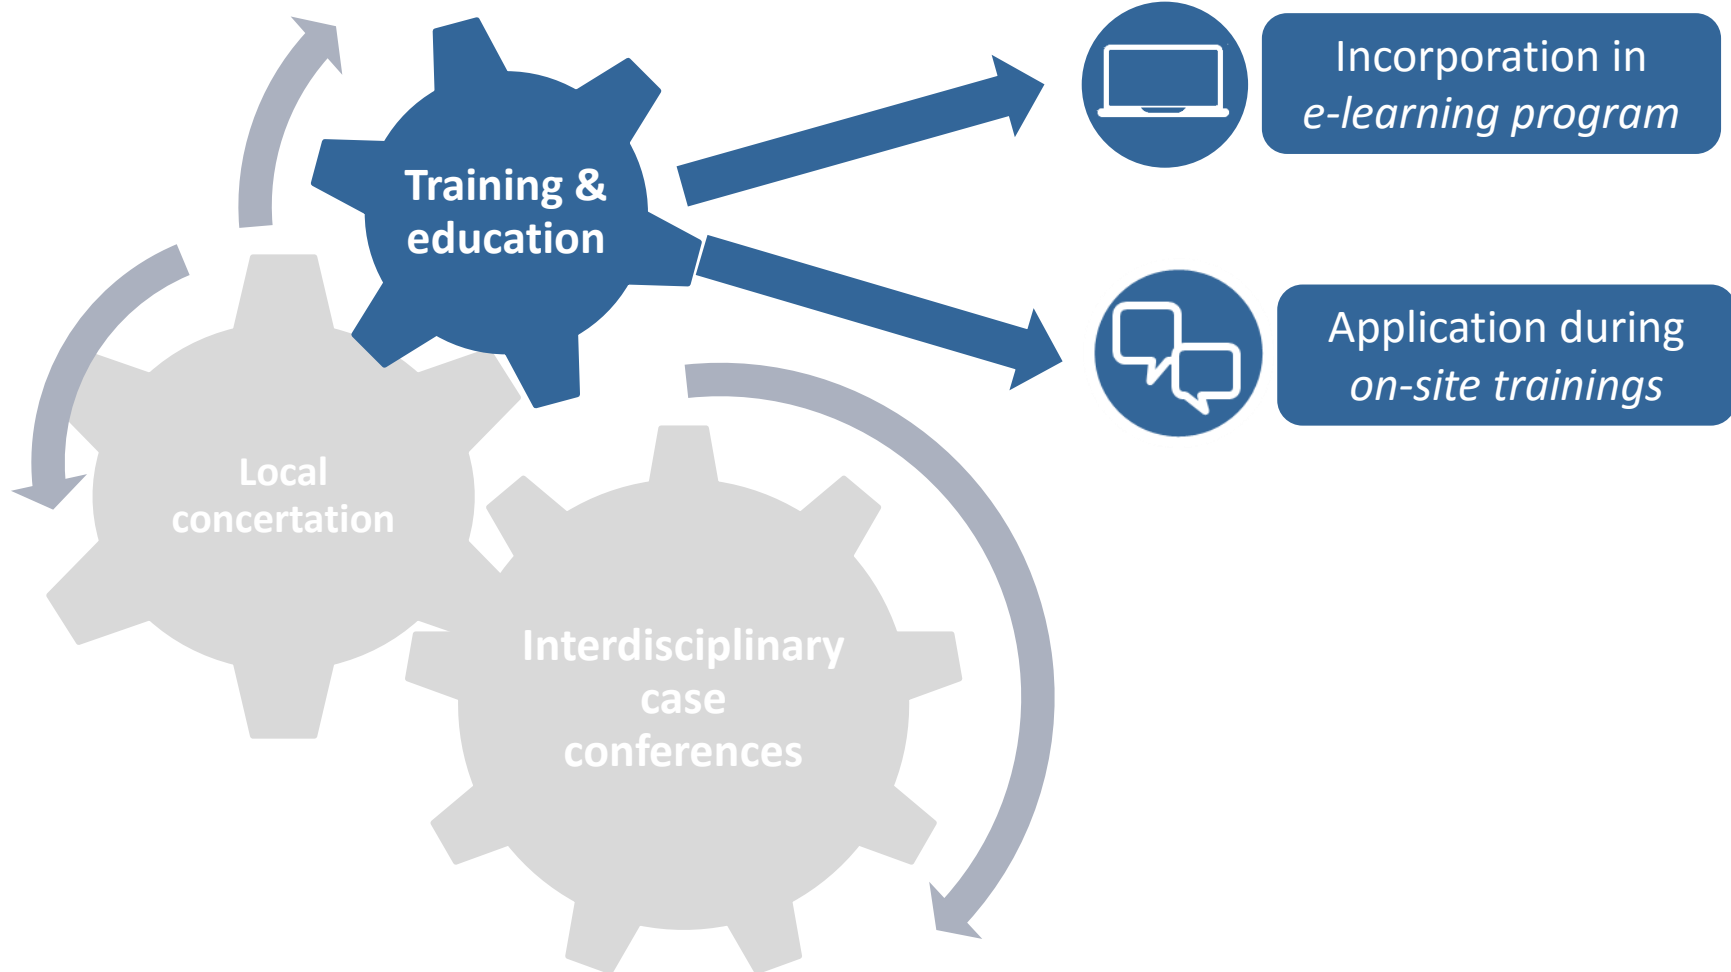

GSASA

- No subdomains
- 1 intervention

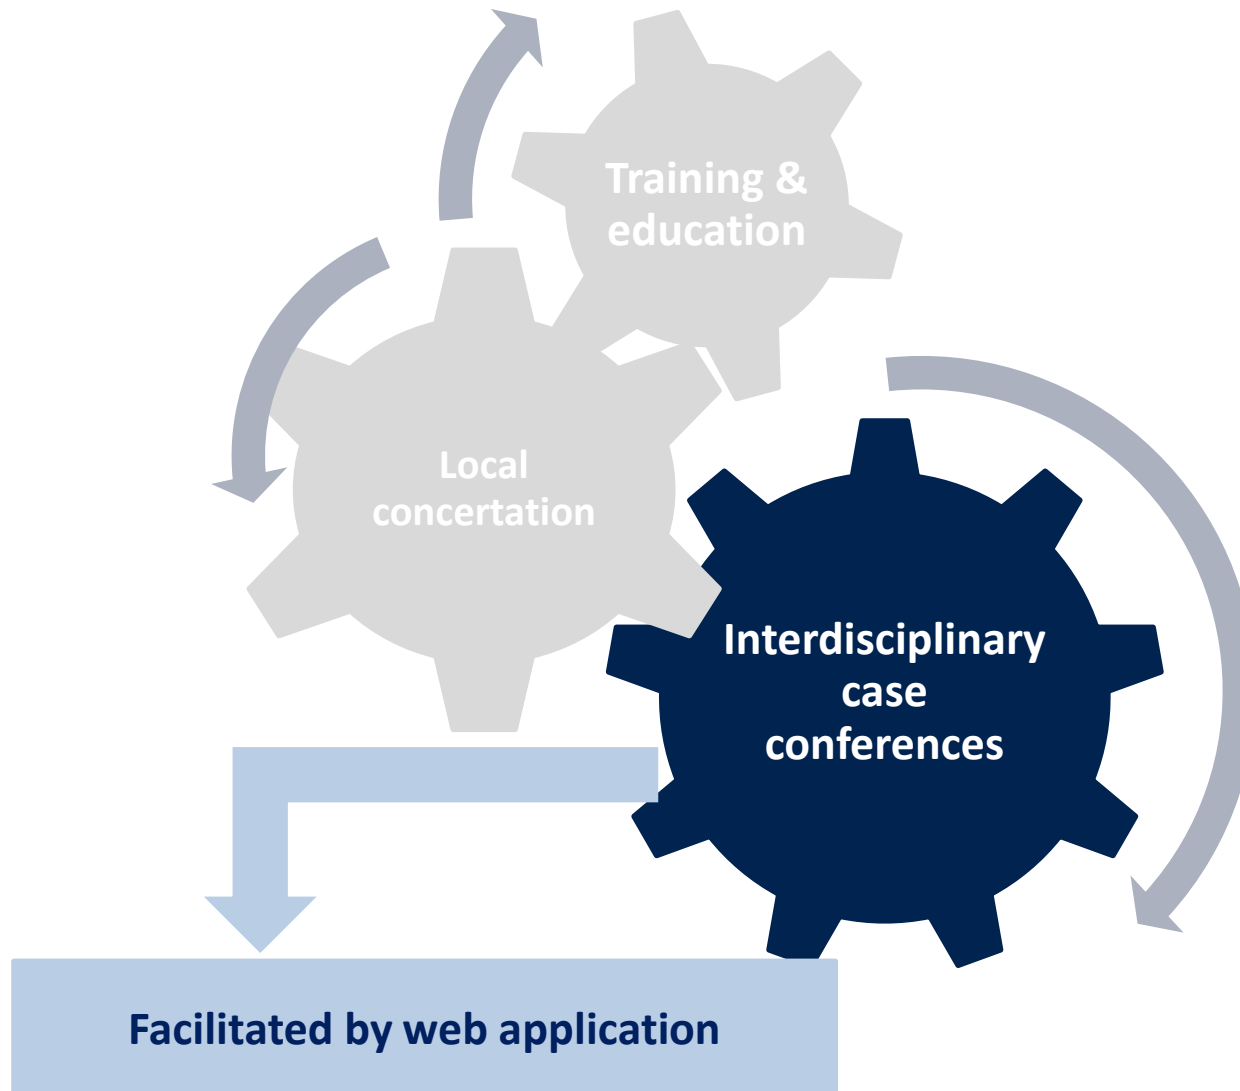

Come-On study

- No subdomains
- No levels: *specific population/setting*
- Specified (*increase/decrease vs. modification*)
- DRP discussed at next case conference
- No intervention (*i.e. no consensus in team*)
- 1 main intervention

Implementation of DRP classification tool

Implementation of DRP classification tool

Implementation of DRP classification tool

Mevr. Landers, Yvette (°06/06/1927)

Zorgverleners

Arkansas, Peter Verpleegkundige
Hollanders, Caroline Arts
Van Ghent, Suzanne Apotheker

Huidig dossier - Landers, Yvette

Aangemaakt op 21/05/2015, laatst gewijzigd op 21/05/2015

[Gegevens raadplegen of wijzigen](#)

 **Klinische gegevens**

 **Indicaties, scores comorbiditeiten en labwaarden**

 **Medicamenteuze behandeling**

 **Economische parameters**

[Multidisciplinair Overleg](#)

Volgend Overleg: 21/05/2015 20:30

 **Geneesmiddelgebonden problemen en overleg**

[Suggesties voor het overleg](#)

 28/05/2015, Peter Arkansas
**EXELON 4,6MG/24U PLEISTER
TRANSDERMAAL 30**
Gedragsproblemen: agitatie, dwaalgedrag
(zwerft 's nachts door de gangen)

Na overleg blijkt geen probleem te zijn

[Samenvatting gegevens](#)

Indicaties en klinische gegevens

Geneesmiddelen : Ongewenste effecten + beschrijving
Cardiovasculair stelsel : Arteriële hypertensie
Endocrien-metabool stelsel : Diabetes Mellitus type II
Neurologisch stelsel : Dementie / Dementieel beeld / Aanhoudende cognitieve problemen, Gedragsproblemen gerelateerd aan dementie
Allerlei : Chronische nierinsufficiëntie

Labwaarden
Hb1Ac : 6,5
Geschatte GFR (MDRD formule) : 31

Gesloten dossiers

Landers, Yvette - Baseline 04/2015 van 21/05/2015 tot 21/05/2015

Suggestions

Implementation of DRP classification tool

Geneesmiddelgebonden probleem

Moment waarop het GGP werd vastgesteld / aangepakt
