# Development and Validation of mediPORT: A Simple Pre-Operative Risk-prediction Tool for Drug-Related Problems

**Mag. pharm. Dr. Stephanie Clemens, MA, MHC**

Institute of Pharmacy | Department of pharmaceutical Biology and clinical Pharmacy | Paracelsus Medical University Salzburg

Center of Public Health and Health Services Research | Paracelsus Medical University Salzburg

Department of Anesthesiology, Perioperative Medicine and Intensive Care Medicine | University Hospital of the Paracelsus Medical University Salzburg

*Authors: Stephanie Clemens, Clara Simon, Wanda Lauth, Olaf Rose, Georg Zimmermann, Peter Gerner, Christina Dückelmann, Maria Flamm, Johanna Pachmayr*

# Inappropriate pre-operative medication management → RISK

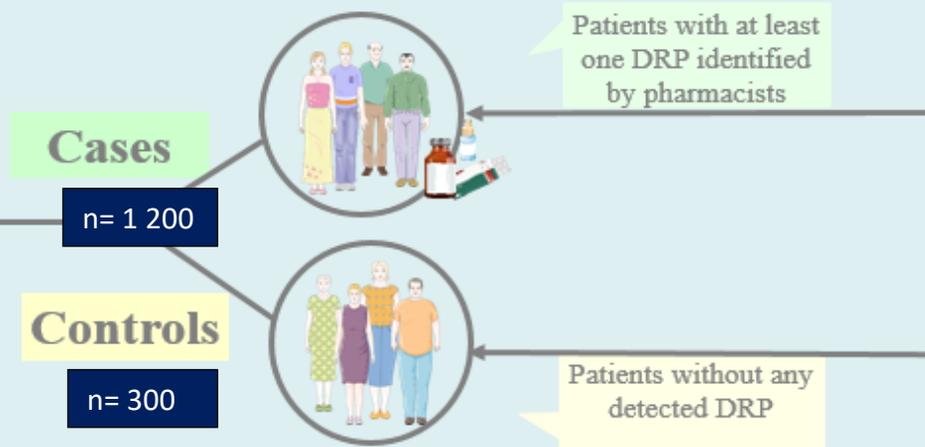

**Aim:**

**Design:** Case-Control Study

**Setting:** Pre-anesthesia clinic of the University Hospital Salzburg

**Waiting Room, PAC**

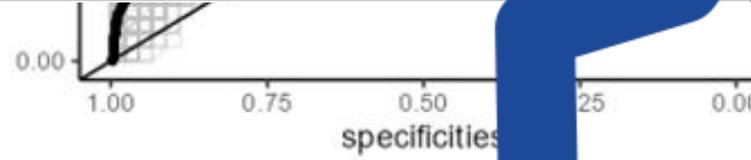

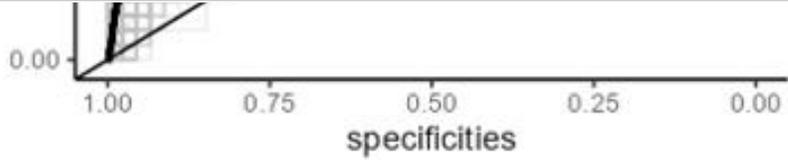

**Target population n= 11 176**

2021 Time: retrospective case-control study

**Essential Points of Internal and External Validation Results for a Prediction Model**

<b>Models with Strong Performance</b>	<b>Models with Weak Performance</b>
<b>Good Discrimination</b>	<b>Poor Discrimination</b>
Large AUC (traditionally larger than 0.700 or 0.800)	Small AUC (closer to 0.500)

Sensitivity  $\geq 78\%$   
 Specificity  $\geq 75\%$

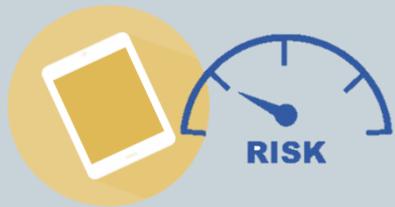

**AUC (5VM) = 0.823 (CI 95% 0.766-0.879)**

**AUC (2VM) = 0.872 (CI 95% 0.835-0.909)**

**5-Variable Model**

**Age, Number of drugs at admission, Body-Mass-Index, and Renal function**

**2-Variable Model**

**Age, Number of drugs at admission**

# Demonstration of the mediPORT tool

## What's NEXT?

MediPORT 2.0 study – external validation  
a prospective, national, multicentre observational study
