

Pharmaceutical Care Network Europe

PCNE Second Working Symposium on Medication review

Dublin, 18th October 2011

Summary from last meetings and workshops in Geneva and Manchester

Prof. Dr. Kurt Hersberger (Switzerland)

PCNE Definition

Medication review is an evaluation of patient's medicines with the aim of managing the risk and optimizing the outcome of medicine therapy by detecting, solving and preventing drug-related problems. (Manchester 2011)

Types of Medication Review (PCNE)

„simple“ Medication Review

→ based on the medication history in the pharmacy

„intermediate“ Medication Review

→ Based on medication history + patient interview

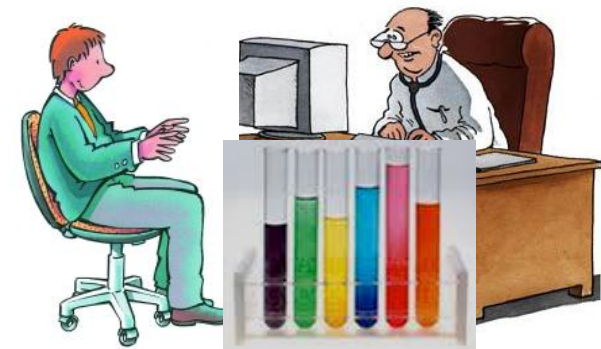

- MUR, Polymedikations-Check
- „Brown Bag“-Methode

„advanced“ Medication Review

→ medication history + patient interview + clinical data

- Clinical Medication Review

Medication Review

→ as Community Pharmacy Service

???

Types of Medication Review (PCNE)

„simple“ Medication Review

→ based on the medication history in the pharmacy

„intermediate“ Medication Review

→ Based on medication history + patient interview

- MUR, Polymedikations-Check
- „Brown Bag“-Methode

„advanced“ Medication Review

→ medication history + patient interview + clinical data

- Clinical Medication Review

- Medicines Use Review, MUR
- New Medicine Service, NMS

Home Medication Review, HMR

???

Prescription Validation

- Medication Review – Standard, MR-S
- MR-Pharmacist Consultation, MR-PC
- MR-Follow-up, MR-F

EU initiative on Quality Indicators???

??? Projects *???*

History

→ March 2009: Working Group started in Vimeiro

- Initialisation

→ Nov. 2009: Working Symposium in Geneva

- Reports from BE, FI, CH, GE
- PCNE definition of MR (Version 1)
- PCNE Levels of MR (Version 1)

→ March 2011: Working Conference

- WS2: How to develop/investigate individualised models of pharmaceutical care
(Facilitators: Prof. Ines Krass, Australia & Dr. Charlotte Rossing, Denmark)
- WS3: How to measure individualised patient safety
(Facilitators: Prof. Marcel Bouvy, NL & Prof. Kurt Hersberger, Switzerland)
- WS5: Integrating & using multidisciplinary patient records
(Facilitators: Ms Ann Slee, Dr. Veerle Foulon)

→ March 2011: Working Group Meeting Manchester

Guiding Idea & Approach

- Preferably pharmaceutical care leads to improved effectiveness, safety and humanistic outcomes.
- However, evidence is still weak
- Medication review is an essential activity within the pharmaceutical care cycle
- Different initiatives, approaches, projects are launched across Europe, up to now very independently and dominantly adapted to local regulations and conditions
- Among PCNE members substantial expertise is available
- To bundle resources, competences and “lone warriors” PCNE could boost impact of single initiatives and speed up development of cognitive services.
