

Biography Veerle Foulon

Veerle Foulon graduated as a pharmacist in 1997 and obtained her PhD in 2001 for fundamental biochemical research on the enzymes involved in the alpha-oxidation of 3-methyl branched fatty acids.

Since mid-February 2006, she works at the Research Centre for Pharmaceutical Care and Pharmacoeconomics of the K.U.Leuven, Belgium. Her research focuses on the implementation of pharmaceutical care in the community pharmacy in Belgium, and on the impact of pharmaceutical care programs for specific groups of patients. She teaches communication skills and self-medication, and is the driving force behind the internship programs in the second bachelor and master years. She is also coordinator of the master theses in Pharmaceutical Care, and is involved in postgraduate training for pharmacists.
