

Charlotte Rossing, MSc, PhD (Pharm)

Charlotte Rossing graduated from the University of Copenhagen, Faculty of Pharmaceutical Sciences in 1998. In 2003 she received a PhD degree in Social pharmacy with a thesis named: "The Practice of Pharmaceutical care in Denmark - a quantitative approach", including 4 international publications. Subsequently, Charlotte Rossing joined Pharmakon, where she is Head of department for Research and Development for community pharmacy.

Charlotte Rossing has been involved in following projects:

- Medical technology assessment of dose dispensing
- Safe and effective medication (compliance and concordance)
- Compliance technologies
- Better use of medicines in residential and nursing homes
- Medication reviews and counselling
- Patient safety in the medication of disabled persons in residential facilities

Furthermore, she is responsible for the Danish community pharmacy evidence database, which is a searchable database containing assessed literature in intervention research in pharmacy practice and primary health care.

Charlotte Rossing acts as reviewer for several international journals. She acts as chair and co-chair for FIP Forum for Innovators 2011-12, a programme organised by FIP Community Pharmacy Section. She has twice been a workshop leader at PCNE working conferences.
