PCNE-DRP Symposium Geneva

DRP workshop 2: **The PCNE classification 5.1 versus 6**
Chair: Foppe van Mil, the Netherlands

Abstract
Are all problems in the V5.1 indeed DRPs or causes? Did we cover all problems, or are there unmentioned DRPs. Is the proposed V6 the solution or are more adaptations necessary.
Desired outcome: Thoughts on the new PCNE classification V6, which must not necessarily be compatible with V5.1 .

Content & workflow
Participants are asked to discuss following:
1. What were problems with the PCNE classification V 5.1?
2. How can these problems be repaired?
3. Does the proposed V 6 provide solutions, or is further work necessary?
4. What changes would possibly improve the performance of Version 6?
